- A CLI that helps bootstrap a new well-structured express app on npm

## Work Experience

### Frontend Developer
**AMJN (Ahmadiyya Muslim Jama'at Nigeria) | Frontend Engineer | Remote | 2025 – Present**
- Developed the frontend of a report portal web application for executive members to submit monthly activity reports to the Jama'at headquarters.
- Integrated APIs from the backend team to fetch, submit, and auto-collate report data in real-time.

### Frontend Engineer
**Borome Limited. | February 2020 - May 2024**
- Developed and maintained user interfaces for web applications, ensuring responsive and accessible designs across devices.
- Collaborated closely with backend teams to integrate RESTful APIs for seamless data communication between frontend and server.
- Implemented modern frontend tools and frameworks to enhance application performance, usability, and user experience.
